Jerko
Sprühsysteme

CUSTOMISED & ALL FROM ONE SOURCE

This is what we offer

Industry 4.0 put into practice!

State-of-the-art controls combined with intuitive operation concepts.

Flexibility and freedom of design are the main advantages of our modular control concepts.

Due to the use of decentralised peripherals and communication through Profinet or I/O-Link, our systems can also be easily integrated into existing units.

Our focus:

Digital as well as networked complete systems including the related systems with maximum productivity, flexibility and economic efficiency.

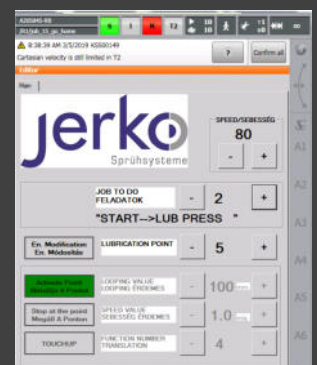

Our services — an overview

- Control cabinet engineering
- EPLAN P8
- Programming
- Robotics
- Motion control
- Simulation
- Designed, built and safe according to Machinery Directive 2006/42/EC

Project examples

Robot interface

Programming of robots without previous knowledge and extensive programming training.

Control cabinet engineering

From design to manufacture — all from one source.

Visualisation

Up-to-date and intuitive operation
All actuators and sensors can be programmed in the HMI without a programming device.
